

# Benefits of Using Smartlipo® Technology

## Compared to Traditional Liposuction

### What Is Smartlipo®?

*Smartlipo, or laser liposuction, melts fat using laser energy. The three laser wavelengths contribute to the disruption of fat, coagulation of blood vessels and stimulation of collagen production, which tightens skin and improves elasticity.*

### Smartlipo Benefits

- **Minimally invasive** procedure requiring only tiny incisions
- **Reduces** post-op cellulite and sagging skin
- **Faster recovery time** with minimal, short-term pain
- **Less** bruising, trauma and swelling
- **Much safer** on delicate areas of the face such as the cheeks, neck and chin
- **More effective** at removing stubborn pockets of fat and contouring the body's shape
